

TR106 Primavera P6 R17

Advanced Course

Overview

This two-day course provides in-depth project management training in Primavera's client/server-based solution. Building off skills learned in course 102, the 106 course covers advanced subjects such as earned value analysis; updating baselines; and scheduling options. Hands-on workshops enable students to apply skills learned throughout the course.

Learning Outcomes

- Modify projects using advanced functionality
- Analyze projects using earned value
- View Primavera data in other applications ie MS Excel
